### 7 Ways for Students to be Successful through Distance Learning

1

#### **Set Goals!**

With digital learning, you determine how successful you will be. Set weekly and daily goals to help you stay focused and determined to succeed. Check on your goals daily to determine if the change is necessary.

2

#### **Have a Plan!**

With digital learning, you decide what you are doing, or not. Develop a plan to help you stay on track. Use your Google Calender or a paper agenda to help you stay organized with class time, assignments, and due dates

3

#### **Create a Study Space!**

Whether if it is the sofa, kitchen, or closet, you need a space to be yours. Create a positive virtual workspace. Try to leave it intact so you do not have to recreate it every day.

4

#### **Maintain High Expectations!**

Just because it is distance learning, does not mean you get to be free as you wish. Maintain high expectations of yourself, your teacher, and your peers. Conduct yourself like you would in a normal classroom setting.

5

#### **Stay Engaged!**

You are more likely to succeed during distance learning if you engage in the lesson and participate. Discuss your ideas with your class.

6

#### **Know your Learning Style!**

Identify how you learn best. Do you need to hear it, see it, or feel it to understand the concept? Use the style that helps you the best while studying on your own.

7

#### **Relax!**

Distance learning is new to most of us. If you become frustrated, take a minute to relax. During this time you could discuss the situation with someone, eat a healthy snack, move around, etc.
